PeroxyChem hires Zheng Jiang as a Food Safety Scientist

Philadelphia, Pa – December 3, 2014 – PeroxyChem is pleased to announce that Zheng Jiang has joined the Food and Beverage division as a Food Safety Scientist.

In this role, Zheng will oversee food safety application and development activities from concept and discovery through launch for PeroxyChem Food and Beverage products. Her work will include bench studies and coordinating test trials in support of new products and collaborations with customers and external resources. She will be closely supported by PeroxyChem’s research and development team in the fields of microbiology, biochemistry, organic and physical chemistry, regulatory affairs and process and chemical engineering.

“Zheng brings strong technical expertise and valuable experience in food pathogen control to PeroxyChem’s team,” said John Wallace, global business manager Food Safety. “The demand for reliable and safe bacterial control chemistries, and the knowledge to implement them effectively and efficiently is growing at a rapid rate. With Zheng’s help, we look forward to expanding and enhancing our ability to provide our customers with the technical support, product and application innovation and customer-oriented solutions that enable them to supply safe, reliable products for their customers.”

Prior to joining PeroxyChem, Zheng worked as a Technical Support Specialist with Romer Labs (formerly SDIX food safety division). She was responsible for designing and conducting intensive and extensive experimental protocols and application projects in food pathogen and allergen control. Prior to that, Zheng worked as a Microbiology Lab Technician for FMC Biopolymer.

Zheng obtained a Master of Science degree in Food Science from the University of Delaware. She holds a Bachelor of Engineering in Food Quality and Safety from Shandong Agricultural University in China. She is published in Food Microbiology journal and the Journal of Food Science.

About PeroxyChem
PeroxyChem is a global leader in peroxygen and adjacent chemistries. The company employs approximately 600 people throughout the world, with facilities in North America,
Europe and Asia. With an unyielding commitment to safety at its core and backed by an exceptional team, the company prides itself on exemplary customer service, product quality, reliability and technical service. PeroxyChem manufactures high quality products and innovative applications developed as a result of innovation and superior technical expertise. We supply customized chemistries for electronics, energy, environmental, food safety, pulp, paper, polymer, and other industrial and consumer markets.

**Food and Beverage**

PeroxyChem’s Spectrum®, VigorOx®, BlitzTM, Durox®, and Clarity® set the standard in environmentally friendly sanitizers for poultry, red meat and aseptic packaging. Our hydrogen peroxide and peracetic acid based sterilants offer efficient, effective, reliable bacterial control and help processors set new benchmarks for efficiency and productivity.
