PeroxyChem Aseptic Packaging to Attend Aseptipak Latin America

PHILADELPHIA, Pa. – October 22, 2015 – PeroxyChem announced today it will attend and present at Aseptipak Latin America, a global forum being held in Mexico City, Mexico from October 26 - 27.

PeroxyChem’s presentation will focus on high performance grades of hydrogen peroxide for new generations of aseptic beverage fillers. In addition, PeroxyChem will share news of its new hydrogen peroxide product, Durox® Advance. This new ultra-low residue food grade hydrogen peroxide sterilant is formulated for high-performance spray and vapor sterilization aseptic packaging systems. Thanks to the exceptional purity and extremely low residue build-up, Durox® Advance allows beverage and dairy manufacturers to extend cleaning intervals and reduce operating costs.

All Durox® products meet the high-purity requirements of the Food Chemicals Codex and are used in aseptic beverage packaging as well as other food and pharmaceutical sterilization applications.

“PeroxyChem Mexico, formerly Electro Química Mexicana, is a leading manufacturer of hydrogen peroxide, supplying high-performance grades of hydrogen peroxide to the majority of aseptic beverage and dairy manufacturers in Mexico and Central America,” said Pavel Korzinek, global segment manager, PeroxyChem. “We’re excited to attend this year’s conference and share with our clients in the region the advances we have made in aseptic packaging sterilants.”

Through a deep understanding of the aseptic packaging market combined with responsive customer service and technical expertise, PeroxyChem provides cost-effective solutions that meet regulatory demands and consumer preferences. PeroxyChem Aseptic Packaging offers a robust portfolio of globally branded hydrogen peroxide grades formulated specifically for each type of aseptic equipment for spray, vapor and bath sterilization systems.

To learn more about high performance grades of H₂O₂ for new generations of aseptic fillers,
Dr. Kevin Huang and Edgar Tellez will be presenting at the show on Monday, October 26, at 8:30am. This session will be followed by a PeroxyChem-sponsored coffee break.

**About PeroxyChem Aseptic Packaging**
The PeroxyChem Aseptic Packaging team has been supplying high-quality and effective oxidation sanitizers and sterilants to the aseptic packaging market for more than 50 years. With a robust portfolio of products and deep technical prowess, PeroxyChem meets progressive market demands with the most efficient and cost effective technologies available.
